

## Ardmore Shipping Corporation Announces Financial Results For The Three And Six Months Ended June 30, 2015

HAMILTON, Bermuda, Aug. 4, 2015 /PRNewswire/ -- Ardmore Shipping Corporation (NYSE: ASC) ("Ardmore" or the "Company") today announced results for the three and six months ended June 30, 2015.

### Highlights

- Reported a net profit of \$7.9 million for the three months ended June 30, 2015, or 30 cents basic and diluted earnings per share, as compared to \$0.1 million, or 0.4 cents basic and diluted earnings per share, for the three months ended June 30, 2014. The company reported EBITDA (see Non-GAAP Measures section below) of \$16.8 million for the three months ended June 30, 2015, an increase of \$11.8 million from \$5.0 million for the three months ended June 30, 2014.
- Continued to deliver strong chartering performance with our spot trading MR tankers earning \$22,402 per day for the three months ended June 30, 2015. The charter market is continuing to strengthen and currently our spot trading MR tankers are earning \$23,500 per day for voyages in progress with approximately 43% of spot revenue days booked for the third quarter of 2015.
- Took delivery of three vessels since the last quarter. The *Ardmore Sealion* and *Ardmore Seafox*, two 49,999 Eco-design IMO3 MR tankers constructed at SPP Shipbuilding in South Korea, delivered on May 26, 2015 and June 25, 2015 respectively. The *Ardmore Chinook*, a 25,217 Dwt Eco-design IMO 2 product and chemical tanker, was delivered from Fukuoka Shipbuilding, Japan on July 17, 2015.
- Total debt drawn down in the quarter amounted to \$69.1 million, in line with vessel deliveries and cash released from a refinancing arrangement completed in the first quarter.
- On July 15, 2015, Ardmore's Board of Directors announced a cash dividend of \$0.10 per share for the quarter ended June 30, 2015. The dividend is payable on August 14, 2015 to all shareholders of record on July 31, 2015. The Company is currently evaluating a dividend increase, which it expects to announce in the coming weeks and which would commence with the third quarter, in recognition of the completion of its newbuilding program and the continued strength of the charter market, which have resulted in significantly increased earnings.

Anthony Gurnee, the Company's Chief Executive Officer commented:

*"Once again we are pleased to report a very successful quarter, with earnings of \$7.9 million representing 30 cents per share, a 50% increase from the first quarter. This performance is attributable to market strength combined with well-timed fleet growth, as well as a flexible chartering strategy placing emphasis on spot trading and a highly efficient operating platform. We expect that our performance will continue to strengthen through the year as a result of a continuing robust charter market and fleet growth, with our final three tankers delivering by year-end. In light of this strong performance, our Board is evaluating a dividend increase commencing with the third quarter, which we expect to announce in the coming weeks."*

*The charter market has continued to strengthen year-to-date, with momentum building through July and into August in an otherwise quiet time of the year for the product tanker market. We believe that demand growth will continue to be supported by the new oil market, characterized by heightened oil demand, storage inefficiencies, and long-haul oil trading activity, as well as the ongoing fundamental shift in refinery capacity to oil producing nations, which in itself is significantly boosting ton-mile demand. In the meantime, MR supply growth is moderate relative to demand, and the order book is shrinking rapidly with deliveries far exceeding new orders."*

The final vessel in the Company's newbuilding program is expected to deliver in late October 2015, at which point the Company will have 24 ships in operation generating earnings and cashflow.

## *Management's Discussion and Analysis of Financial Results*

Revenue for the three months ended June 30, 2015 was \$39.3 million, an increase of \$25.5 million from \$13.8 million for the three months ended June 30, 2014. The increase is due to an increase in the average number of owned vessels to 18.4 for the three months ended June 30, 2015, from 11.1 for the three months ended June 30, 2014, and an increase in earnings per day generated by vessels employed in the spot market. The Company had eight vessels employed under direct spot chartering arrangements as at June 30, 2015 and had one vessel employed under direct spot chartering arrangements as at June 30, 2014. Under direct spot chartering arrangements, revenue is recognized on a gross freight basis, while under time chartering arrangements and pools, the charterer typically pays voyage expenses and revenue is recognized on a net basis.

Commissions and voyage related costs were \$8.5 million for the three months ended June 30, 2015, an increase of \$8.2 million from \$0.3 million for the three months ended June 30, 2014. This increase is primarily due to 681 additional revenue days in the second quarter of 2015 as compared to the second quarter of 2014, in line with the additional vessel deliveries noted above. Furthermore, the increase in spot

employed vessels significantly increases commissions and voyage related expenses, as under a spot chartering arrangement, all voyage expenses are borne by Ardmore, as opposed to the charterer, while under time chartering arrangements and pools, the charterer typically pays voyage expenses.

Time charter equivalent ("TCE") revenue, a non-GAAP measure, is vessel revenues less commissions and voyage related costs (including bunkers and port charges). TCE revenue is a standard shipping industry measure used primarily to compare performance of the Company's fleet irrespective of changes in the mix of employment (i.e. direct spot charters, pool employment or time charters). TCE per day amounted to \$18,675 per day for the three months ended June 30, 2015, increasing by \$4,506 per day from \$14,169 per day for the three months ended June 30, 2014.

Vessel operating expenses were \$11.3 million for the three months ended June 30, 2015, an increase of \$4.7 million from \$6.6 million for the three months ended June 30, 2014. This increase is primarily due to an increase in the number of vessels in operation for the three months ended June 30, 2015. Due to the nature of this expenditure, vessel operating expenses are prone to fluctuations between periods. Fleet operating costs per day, including technical management fees, were \$6,457 for the three months ended June 30, 2015, as compared to \$6,470 for the three months ended June 30, 2014.

Depreciation expense for the three months ended June 30, 2015 was \$5.7 million, an increase of \$2.3 million from \$3.4 million for the three months ended June 30, 2014. The increase is due to an increase in the average number of owned vessels to 18.4 for the three months ended June 30, 2015, from 11.1 for the three months ended June 30, 2014.

Amortization of deferred dry dock expenditure for the three months ended June 30, 2015 was \$0.6 million, as compared to \$0.5 million for the three months ended June 30, 2014. This increase is due to the timing of scheduled drydockings occurring across the fleet. The capitalized costs of drydockings for a given vessel are depreciated on a straight line basis to the next scheduled drydocking of the vessel.

General and administrative expenses for the three months ended June 30, 2015 were \$2.7 million, as compared to \$1.9 million for the three months ended June 30, 2014. The increase is in relation to additional costs associated operating a growing fleet, along with general and administrative expenses being prone to fluctuations between periods.

Interest expense and finance costs (which include loan interest, capital lease interest and amortization of deferred financing fees) for the three months ended June 30, 2015 were \$2.5 million, as compared to \$1.0 million for the three months ended June 30, 2014.

Cash interest expense increased by \$1.4 million from \$1.6 million for the three months ended June 30, 2014 to \$3.0 million for the three months ended June 30, 2015. This is as a result of an increase in the average debt balance following the delivery of vessels since June 30, 2014. Capitalized interest, which relates to vessels under construction, amounted to \$0.9 million for the three months ended June 30, 2015, as compared to \$0.9 million for the three months ended June 30, 2014. Amortization of deferred financing charges for the three months ended June 30, 2015 was \$0.4 million, as compared to \$0.2 million for the three months ended June 30, 2014.

## Forward Looking Statements

Matters discussed in this press release may constitute forward-looking statements. The Private Securities Litigation Reform Act of 1995 provides safe harbor protections for forward-looking statements in order to encourage companies to provide prospective information about their business. Forward-looking statements include statements concerning plans, objectives, goals, strategies, future events or performance, and underlying assumptions and other statements, which are other than statements of historical facts. The Company desires to take advantage of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and is including this cautionary statement in connection with this safe harbor legislation. The words "believe," "anticipate," "intends," "estimate," "forecast," "project," "plan," "potential," "may," "should," "expect," "pending" and similar expressions identify forward-looking statements.

The forward-looking statements in this press release are based upon various assumptions, including, without limitation, Ardmore management's examination of historical operating trends, data contained in the Company's records and other data available from third parties. Although the Company believes that these assumptions were reasonable when made, because these assumptions are inherently subject to significant uncertainties and contingencies which are difficult or impossible to predict and are beyond the Company's control, the Company cannot assure you that it will achieve or accomplish these expectations, beliefs or projections.

In addition to these important factors, other important factors that, in the Company's view, could cause actual results to differ materially from those discussed in the forward-looking statements include: the failure of counterparties to fully perform their contracts with the Company; the strength of world economies and currencies; general market conditions, including fluctuations in charter rates and vessel values; changes in demand for tanker vessel capacity; changes in the Company's operating expenses, including bunker prices, drydocking and insurance costs; the market for the Company's vessels; competition in the tanker industry; availability of financing and refinancing; charter counterparty performance; ability to obtain financing and comply with covenants in such financing arrangements; changes in governmental rules and regulations or actions taken by regulatory authorities; general domestic and international political

conditions; potential disruption of shipping routes due to accidents, piracy or political events; vessels breakdowns and instances of off-hires; and other factors. Please see the Company's filings with the U.S. Securities and Exchange Commission for a more complete discussion of these and other risks and uncertainties.
